# Auto Wudu Washer

Islamic Pre-prayer Ablution System

The Auto Wudu Washer<sup>®</sup> (AWW) (Patent Pending) is the world's first automatic pre-prayer personal washing system introduced to enable an individual to perform the Wudu ablution in a standing position the efficaciously in full conformance to the teachings of the Holy Qur'an.

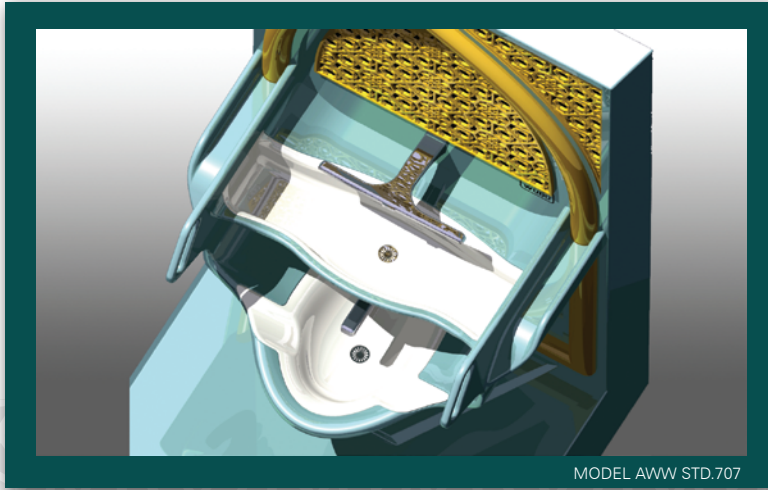

AACE has developed two versions of the AWW<sup>®</sup> to accommodate the needs of individuals and groups in public places. The AWW<sup>®</sup> model STD 707 is specifically designed for use in mosque , offices and

communal prayer rooms while AWW<sup>®</sup> model PRM 708 is targeted for private and family use.

Both versions of the AWW<sup>®</sup> facilitate the washing of the hands, nose, mouth, face, arms and feet as prescribed in the Holy Qur'an by firstly washing the hands from the wrists to the fingers and then by allowing the individual user to collect water in the palms for rinsing of the nose and mouth. This is followed by the washing of the face and subsequent procedures in performing of the Masa'h.

An upper and lower purpose built washer has been designed for personal convenience.

The upper washer in the AWW<sup>®</sup> facilitates the washing and rubbing of the arms and elbows while the lower washer allows for the washing and rubbing of the feet and ankles. All these ablutions can be performed in the AWW<sup>®</sup> reverently and comfortably without spillage or undue wastage of water as the water flow is controlled and dispensed electronically by sensors activated taps.

## Key Benefits

- Allows for ear, face, mouth, hands up to the elbows and feet up to the ankles to be thoroughly wet and washed
- Permits for the effective rubbing of limbs
- Allows for the drying of cleansed areas after Wudu
- Allows Wudu ablution to be performed while standing comfortably
- Low maintenance
- Easy installation
- Facilitates quick efficient washing  
Ergonomic design
- Water dispensed automatically by sensor activated taps
- Unique tap configuration
- Saves water at approximately 1.5 liters per ablution
- Clean and hygienic
- All interior surfaces treated with anti fungal and anti bacterial coating
- Prevents overcrowding in wash rooms

Auto Wudu Washer

# Technical Specifications

**Unit Dimension :** ● Size 1200mm x 2200mm

**Operating voltage & frequency :** ● 24 volts DC operation

- Variable voltages, 110, 120, 220, 240 & 250 at 50HZ and 60HZ with auto detection
- Worldwide adaptability, with multiple electrical configured plug availability with leads that are suitable for all power outlets and voltages

**Water storage capacity :** ● Cold water connected to main water supply

**Energy rating :** ● Maximum power consumption 4 amps

**Aesthetics :** ● Long lasting LED Lighting enhances the units aesthetic values

**Product description :** ● Very quiet, user friendly with low energy

- State of the Art Technology
- Ultrasonic sensing and sequencing for trouble-free operation
- Treated with anti-bacterial and anti-fungus coating which is built-in through the surface development process of the AWW© and protects the AWW© from bacterial activity, mould and fungi and makes the AWW© resistant to microbes that can cause product degradation, odor and stains.
- Long life expectancy of components and with longlasting durability
- Minimal cleaning requirements

**Average number of persons per hour: per AWW© unit :** ● Average time per person to complete one ablutin in under 3 minutes

**Water usage :** ● Quantity of water to perform one ablutin : 1-1.5 liters

**Maintenance & services :** ● Service free

- Low maintenance and easy installation

**Material Specification :** ● ABS nonorganic compound and aluminium

**Warranty period for all electronic components :** ● 24 months

- Warranty covers manufacturing defects

**After Sales service :** ● Provided by authorized dealers
